- Submitted project proposals (2015-2016)

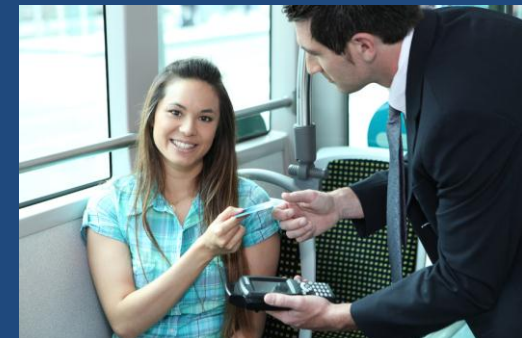

1. Bereal
2. Cosmos
3. MobiservIT
4. APPRISE
5. THRIVE
6. GoF4R

IT2Rail -“Information Technologies for Shift2Rail” project aims at giving access to a complete multimodal travel offer which connects the first and last mile to long distance journeys through the introduction of a Technical Enabler based on the principles:

1. The traveler is placed at the heart of innovative solutions, accessing all multimodal travel services through a travel-companion.
2. An open published framework providing full interoperability

**CIPTEC aims to bring a new thinking and innovative solutions for public transport, in order to create a favourable environment for PT growth.**

**Phase 1:** The current innovation: Present situation and trends in Public Transport

**Phase 2:** The future innovation: exploring the unknown and co-creating the new in Public Transport

**Phase 3:** Capitalisation of the current and future innovation: consolidating findings and building on the results

➤ Thank you for your attention!
