# What is the problem?

National rail systems work comparatively well - but when you cross a border by train everything gets more complex

Infrastructure, timetables, quality of service, and purchasing tickets are all poorer quality

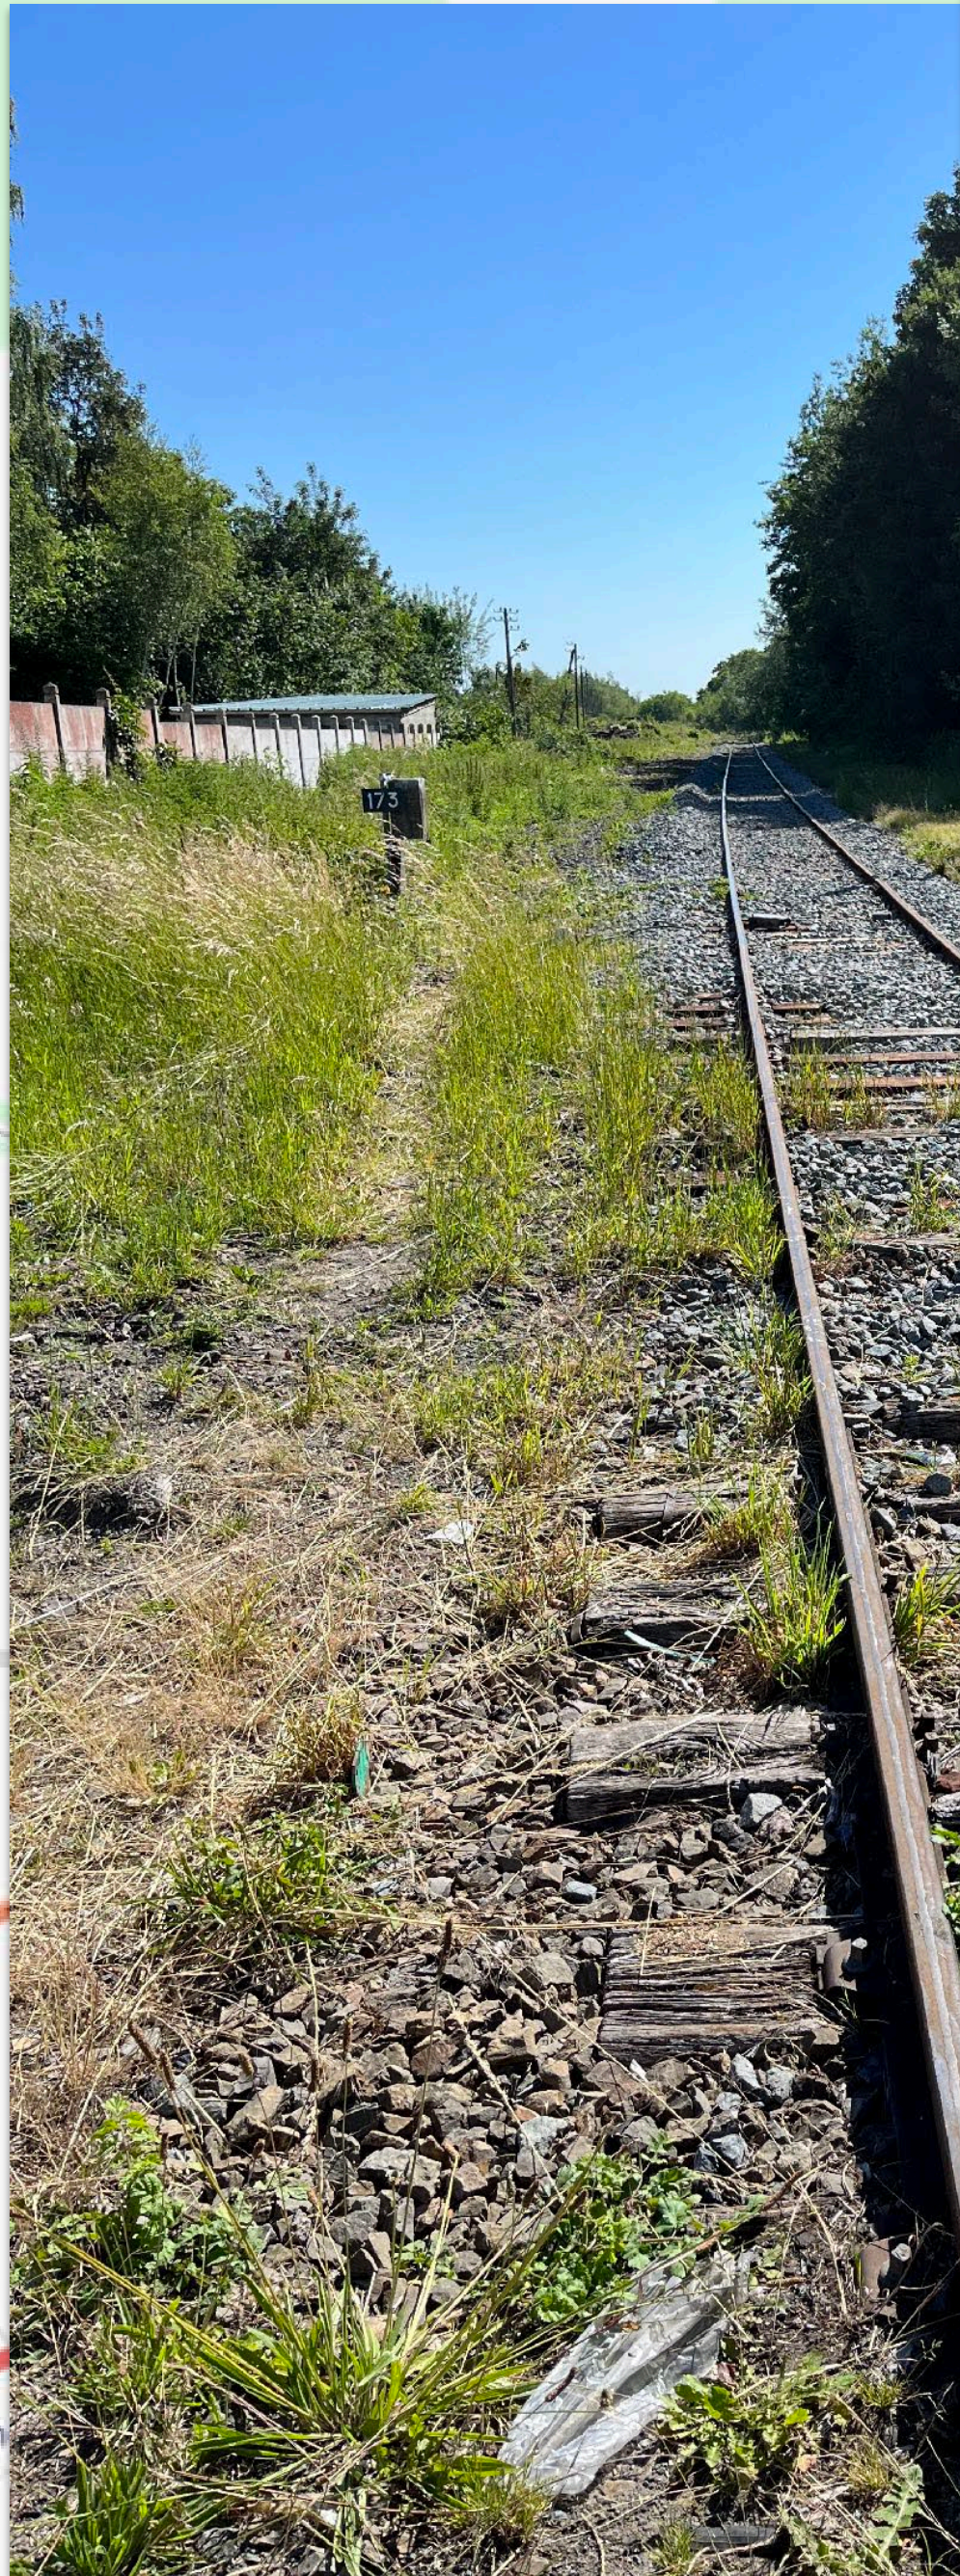

# What is #CrossBorderRail?

A project to cross all the internal borders of the European Union (and Norway and Switzerland) that you can cross by train in one 40-day journey - to highlight the problems and propose solutions

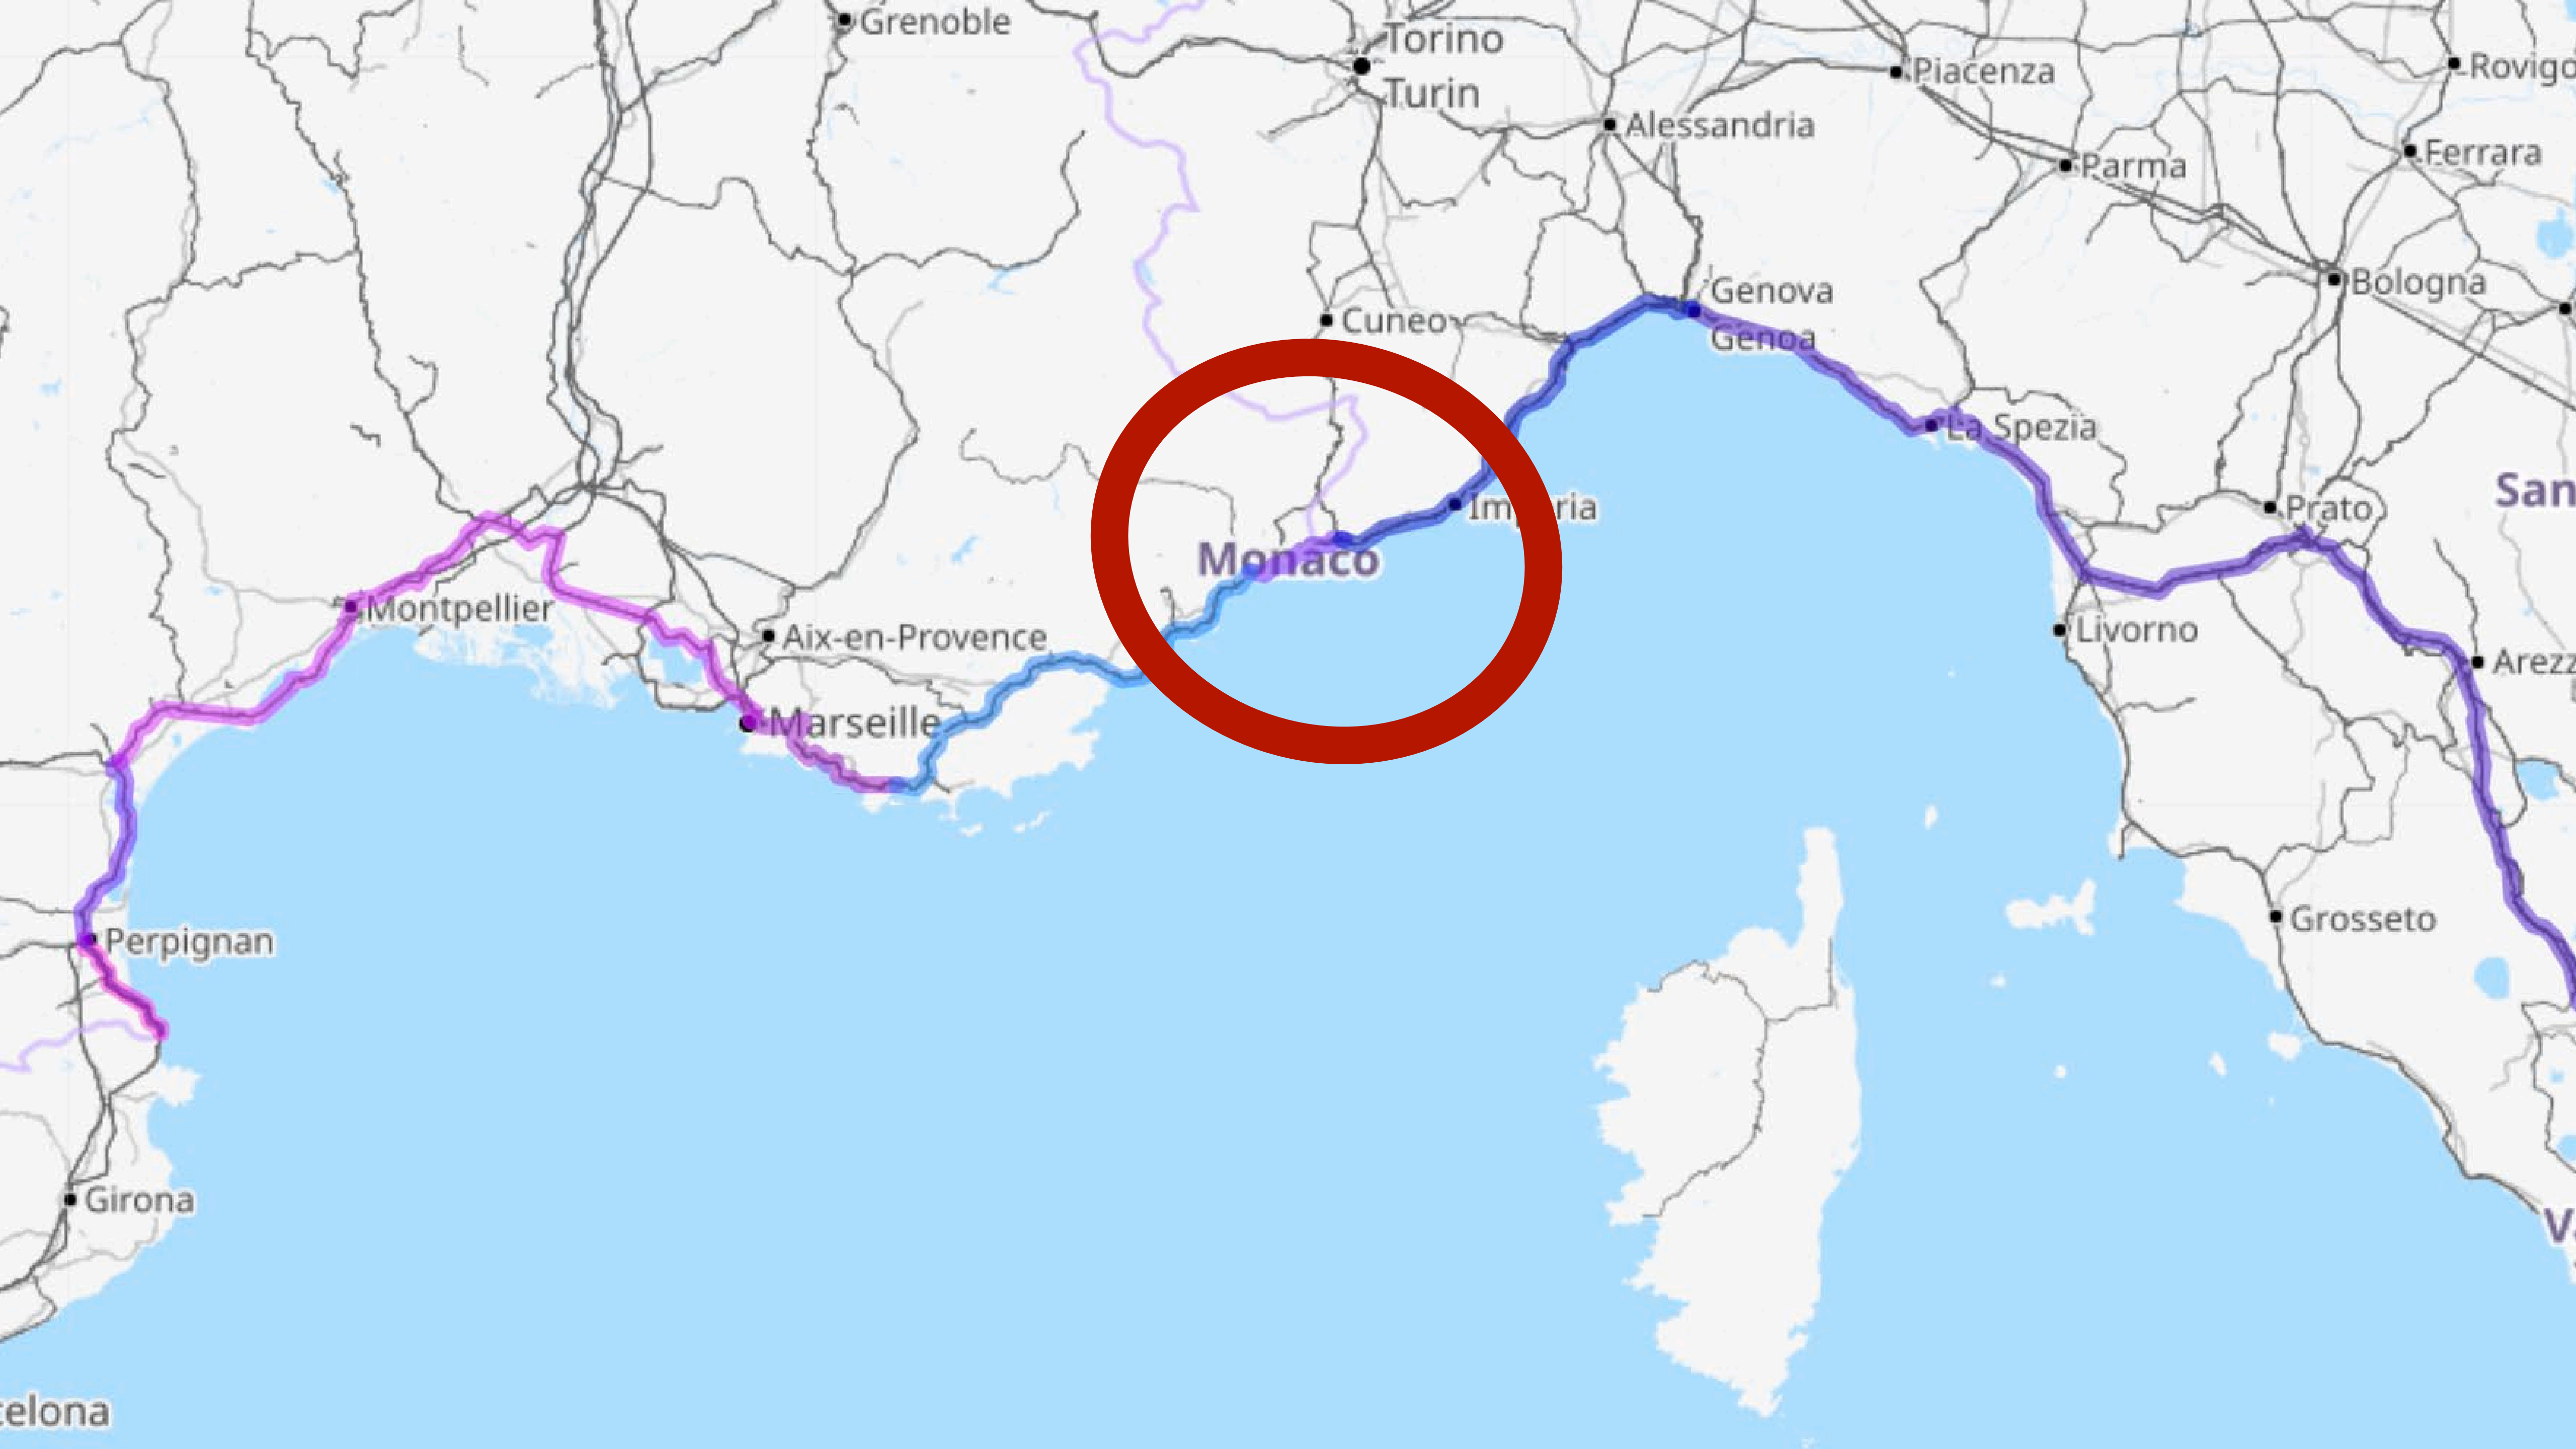

Where there are no trains any more,  
cross the border by bike
